Total usage
 A = Actual E = Estimate C = Customer F or S = Substitute **79 kWh**

Pricing Details				
Products	Usage	Unit Price	Loss factor	*ADC Total Price
Retail 01/07/2013 - 31/07/2013				
Peak	79kWh	27.61c/kWh	\$0.70	\$21.81
Service Charge		\$308.30/Yr	\$0.84	\$28.18

- How much energy have I used?
- In what time frame have I used it?
- What am I being charged per unit of energy (eg. Per kWh for electricity, MJ for gas)?
- Am I charged at different rates for different times; do I have an off-peak rate?
- What are the service charges I am paying?
- Is the reading an 'actual' metre read, or 'estimated'?
